Important Notice

For customers who use licensed Codec ICs and/or licensed codec firmware of mp3:

"Supply of this product does not convey a license nor imply any right to distribute content created with this product in revenue-generating broadcast systems (terrestrial. Satellite, cable and/or other distribution channels), streaming applications(via internet, intranets and/or other networks), other content distribution systems(pay-audio or audio-on-demand applications and the like) or on physical media(compact discs, digital versatile discs, semiconductor chips, hard drives, memory cards and the like). An independent license for such use is required. For details, please visit <http://mp3licensing.com>".

For customers who use other firmware of mp3:

"Supply of this product does not convey a license under the relevant intellectual property of Thomson and/or Fraunhofer Gesellschaft nor imply any right to use this product in any finished end user or ready-to-use final product. An independent license for such use is required. For details, please visit <http://mp3licensing.com>".

Preliminary

For customers who use Digital Wave DRA solution:

"Supply of this implementation of DRA technology does not convey a license nor imply any right to this implementation in any finished end-user or ready-to-use terminal product. An independent license for such use is required."

For customers who use DTS technology:

"This product made under license to certain U.S. patents and/or foreign counterparts."

"© 1996 – 2011 DTS, Inc. All rights reserved."

For customers who use Dolby technology:

"Supply of this Implementation of Dolby technology does not convey a license nor imply a right under any patent, or any other industrial or intellectual property right of Dolby Laboratories, to use this Implementation in any finished end-user or ready-to-use final product. It is hereby notified that a license for such use is required from Dolby Laboratories."

For customers who use MS technology:

"This product is subject to certain intellectual property rights of Microsoft and cannot be used or distributed further without the appropriate license(s) from Microsoft."

Revision History

Date	Version	Description
2013-02-12	1.00	Initial Release
2013-03-08	1.1	Update for Broadcom wifi
2013-07-11	1.1	Add bcm4335
2013-08-30	1.2	Update known issue
2014-02-11	1.3	Update for Kitkat

7. Power/Reset control..... 12

1 Introduction

This document describes how to use Wi-Fi on TCC Android 4.4

2 Supported Wi-Fi modules

Telechips Android 4.4 is supporting only below modules.

We don't support the other Wi-Fi modules. If you want to use other Wi-Fi modules. Please contact to vendor of Wi-Fi module.

	Realtek			Broadcom	
	rt8188cu	rt8189es	rt8188eus	BCM4334 (Murata/Ampak/USI)	BCM4335 (Murata)
Spec	USB / 11n	SDIO / 11n	USB / 11n	SDIO / 11n / dual	SDIO / 11ac / dual
Support	TCC89x demo board	Android dongle / Linux dongle	m805_89x	Android dongle(USI) / Linux dongle(Ampak)	TCC893x demo board

For Wi-Fi Display, Please refer to a document of Wi-Fi Display guide.

3 Setting Wi-Fi

Default Wi-Fi module is Realtek RT8188CU(USB interface). If you want to use another module, please execute '**choosewifi**' command after lunch and kernel defconfig.

my android# choosewifi

Usage: choosewifi < realtek | broadcom>

Ex) realtek rt8188cu

my android # choosewifi realtek rt8188cu

Ex) Broadcom bcm4334

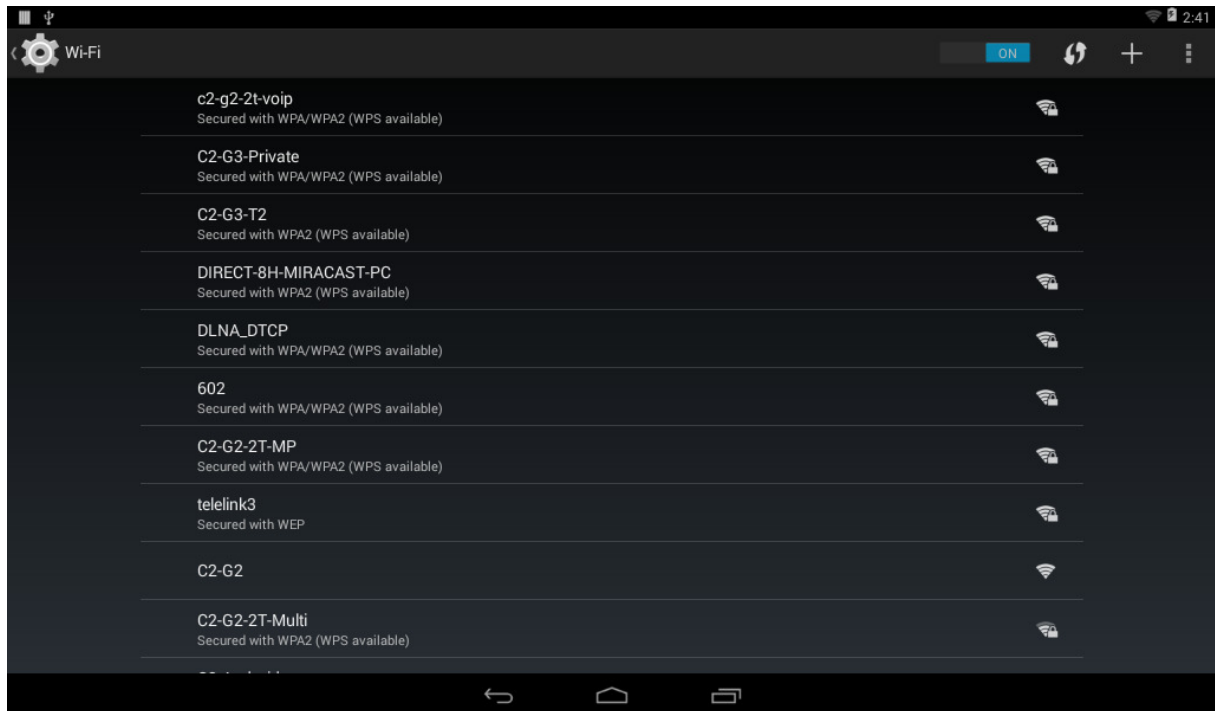

my android # choosewifi broadcom bcm4334

This command builds kernel/android.

And if you download changed rom, **please remove userdata area.**

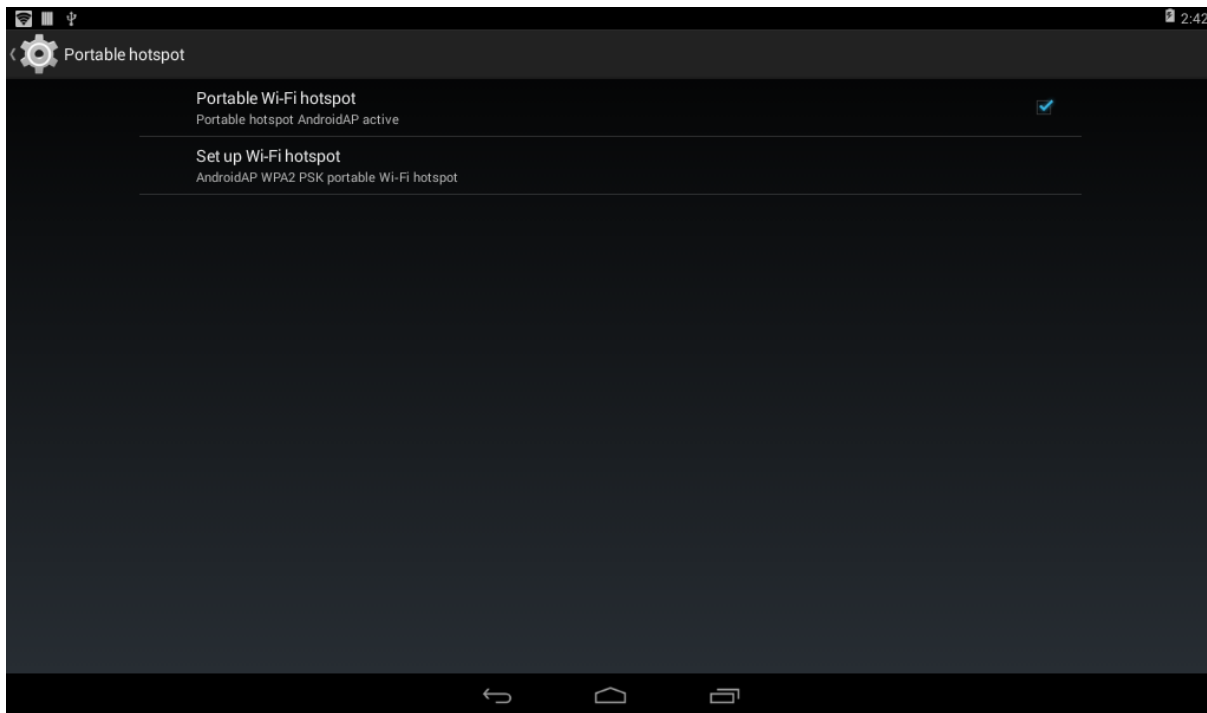

4 Wi-Fi

You can connect Wireless access point.

5. Wi-Fi portable hotspot

You can also use Wi-Fi portable hotspot. But this is useful for you if you have another communication method, for example, Ethernet or mobile.

Default password of portable Wi-Fi hotspot is **123456789**. We fix password like below.

```
diff --git a/wifi/java/android/net/wifi/WifiApConfigStore.java
b/wifi/java/android/net/wifi/WifiApConfigStore.java
index 0531ca3..bbd9e3c 100644
--- a/wifi/java/android/net/wifi/WifiApConfigStore.java
+++ b/wifi/java/android/net/wifi/WifiApConfigStore.java
@@ -206,7 +206,7 @@ class WifiApConfigStore extends StateMachine {
    config.allowedKeyManagement.set(KeyMgmt.WPA2_PSK);
    String randomUUID = UUID.randomUUID().toString();
    //first 12 chars from xxxxxxxx-xxxx-4xxx-yxxx-xxxxxxxxxxxx
-    config.preSharedKey = randomUUID.substring(0, 8) + randomUUID.substring(9,13);

randomUUID.substring(9,13);
    sendMessage(WifiStateMachine.CMD_SET_AP_CONFIG, config);
  }
}
```

6. Wi-Fi Direct

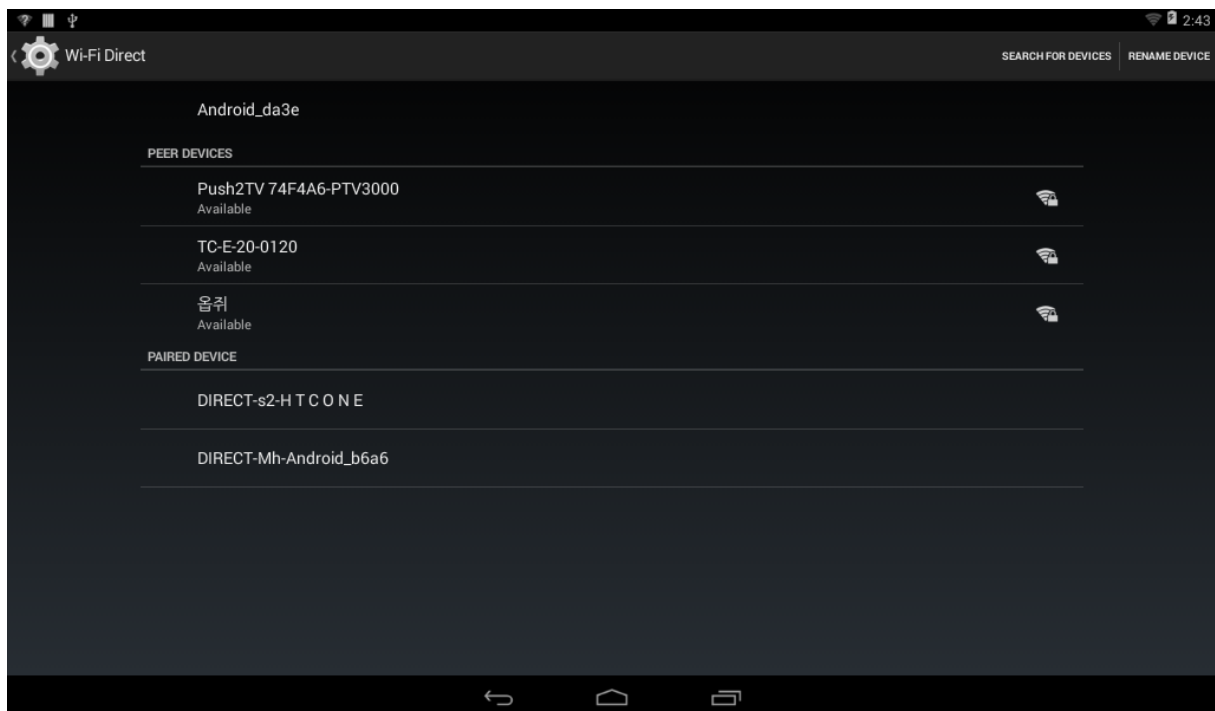

You can find mode detailed information for Wi-Fi Direct.

<http://developer.android.com/guide/topics/connectivity/wifip2p.html>

If you use Wi-Fi module that support concurrent, you can use Wi-Fi Direct as below.

If you use Wi-Fi module that doesn't support concurrent, you can see Wi-Fi Direct menu as below

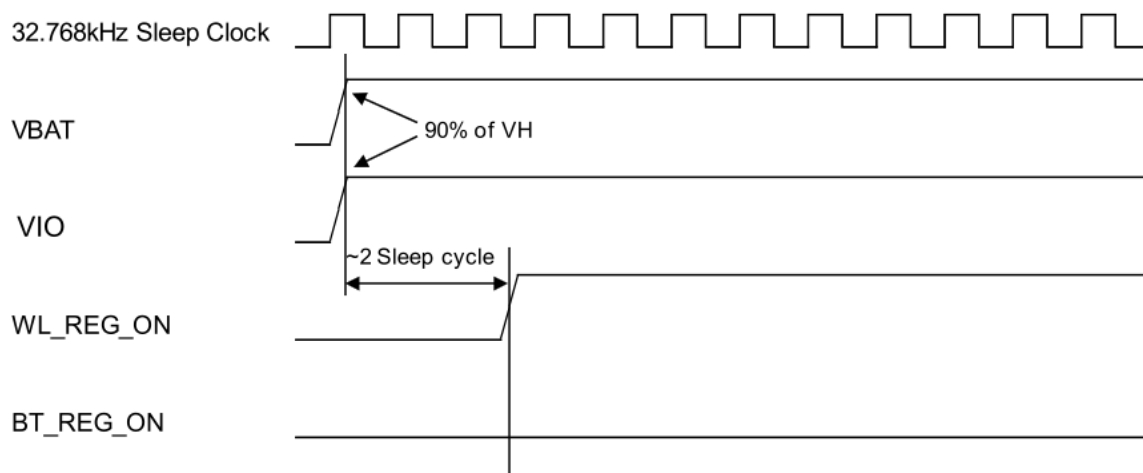

7. Power control for Broadcom module

When you are going to use Wi-Fi+BT combo module, you have to control reset pin in case of below picture, WL_REG_ON, not power pin. It is depend on module specification, so please go over the datasheet of module. Generally combo module has each reset pins.

For example Broadcom BCM4334/4335 is a combo module. Please refer to below picture.

9.2. Power On Sequence for WLAN ON and BT Off

If you want to use Wi-Fi+BT exclusively, you must change this GPIO to reset pin.

The location of power or reset control(Broadcom modules) is kernel/driver/mmc/host/tcc_sdhc.c

```

60 #if defined(CONFIG_BROADCOM_WIFI)
61 #if defined(CONFIG_MACH_TCC893X) && !defined(CONFIG_SUPPORT_BCM4335)
62 #define GPIO_WIFI_EN          TCC_GPEXT1(3)
63 #elif defined(CONFIG_MACH_TCC8920)
64 #define GPIO_WIFI_EN          TCC_GPEXT1(3)
65     #elif          defined(CONFIG_STB_BOARD_DONGLE_TCC893X)           ||
defined(CONFIG_STB_BOARD_DONGLE)
66 #define GPIO_WIFI_EN          TCC_GPB(24)
67 #elif defined(CONFIG_MACH_TCC893X) && defined(CONFIG_SUPPORT_BCM4335)
68 #define GPIO_WIFI_EN          TCC_GPEXT2(5)
69 #elif defined(CONFIG_STB_BOARD_YJ8930T)
70 #define GPIO_WIFI_EN          TCC_GPF(8)
71 #else
72 #error unknown defined

```

```
73 #endif
```

```
74 #endif
```

You have to modify this code(GPIO_WIFI_EN) to fit your hardware
